A new promising treatment of acute hepatic failure. Animal studies]. In a first step the animal experiment compared the haemodynamic effects of liver perfusion and haemofiltration in order to define a scheme of treatment for acute hepatic failure. In the absence of a possibility of lethal haemorrhage, perfusion of the liver was performed in animals with the aid of an extracorporeal circuit in a simple and low-cost system. Haemorrhage and reperfusion were then induced. The haemodynamic consequences of the two techniques were compared with that of no reperfusion. The hepatic circuit, apart from a simple roller pump, comprised an external non-occluded cannula that was directly inserted into the left hepatic lobe. Haemorrhage was induced by an isovolumetric venous bleed at 100 ml/min followed by reinfusion at 200 ml/min. Perfusion was initiated 1 hour after bleeding. Liver perfusion was carried out for 60 minutes. Haemofiltration was carried out by a double-perfused circuit. The animals were killed at various intervals: 0 min, 5 min, 10 min, 15 min, 20 min, 30 min, 40 min and 60 min. In each rat there were an initial bleed, a 30 minute perfusion time and 5 minute haemofiltration time 09e8f5149f

Bigasoft ProRes Converter

You've probably heard of the new Apple ProRes format recently. While it has been yet to launch to the general public, several tools and applications have already been developed to help you convert videos in ProRes format to other formats. Moreover, you can also use specialized programs such as Bigasoft ProRes Converter to convert your desired ProRes videos to other formats. It all depends on what type of device you're using or what kind of software you want to use. For example, it does not support proprietary formats like Apple's own formats (AVCHD) and some video and audio formats. For this, you can use Cineform ProRes Converter. Bigasoft ProRes Converter supports many video and audio formats, such as AVI, MP4, MKV, MOV, M4V, MXF, TOD, DVR, DV, DivX, H.264, Xvid and others. Convert video to other formats Bigasoft ProRes Converter claims to be a ProRes converter, but it also works with various file formats. ProRes files are the only format it supports. However, it can also convert AVI, MKV, MOV, MP4, MXF, TOD, DVR, DV, DivX, H.264, Xvid, and others to ProRes format. Why is it great? Bigasoft ProRes Converter is a powerful software solution that makes it super easy to convert ProRes videos to a wide range of formats. You can use it to convert ProRes videos to many other formats, which include MKV, DVR, AVI, MP4, MOV, M4V, MXF, TOD, DV, DivX, and others. Bigasoft ProRes Converter can also be used to transcode ProRes videos to audio formats, such as MP3, RA and WMA. How to convert ProRes video to MP3 Do you want to convert ProRes video to MP3? Of course, you do! It is an extremely convenient thing to do so and you can use the help of a software solution such as Bigasoft ProRes Converter to convert ProRes to MP3. It is one of the most desirable formats to store music. Furthermore, you can use it to transcode a large number of ProRes videos to MP3. Audio Converter Ultimate is the perfect choice if you are looking for a free program capable of converting audio files with ease.

What's New in the Bigasoft ProRes Converter?
